

# SCIENCE FAIR 2014 - HAVE FUN WITH SCIENCE!

**Hiteon Science Fair - Thursday, March 13, 2014 6:30pm – 8:00pm**

That's right! Time to let those scientific imaginations go and design an experiment reflecting your curiosity and interests. The goal of the Science Fair is to promote scientific thinking, creativity and innovation. You can do an experiment or create an invention – your choice!

**Deadline for registration is Thursday, February 13<sup>th</sup>.** Please remember to turn in your registration forms on time – you don't want to be left out of the fun! You will receive a free posterboard to use for your exhibit. **This year T-shirts will be sold at the door on the night of the fair for \$5 each.**

Here are a few simple guidelines for participating:

1. Pick a project idea and sign up, either individually or with friends - up to four people may work together. **Only one entry form is needed per project. The parent signing the form must ensure that all parents are aware and in agreement.**
2. You may work with your family to do your project, but remember it should be your work and definitely your words explaining it!
3. **Bring your completed projects to the gym anytime between 5pm and 6:30pm on the night of the Fair.** This is not a competition, so relax and enjoy. We will have reviewers speak to each participant and give feedback. You can also see other projects and relate your own experiences.
4. Any questions? Contact Frank Braun at [fdbraun@ix.netcom.com](mailto:fdbraun@ix.netcom.com) (preferred) or 503-590-3749.
